EDUCATION

Korea Advanced Institute of Science and Technology (KAIST) <i>Master, Business and Technology Management Current GPA 4.0 / 4.3</i>	Daejeon, South Korea Aug 2025 - Present
Ajou University <i>Bachelor of Business Administration (Double major : Business intelligence) GPA 4.15 / 4.5</i>	Suwon, South Korea Mar 2021 – Aug 2025
Metropolia University of Applied Sciences GPA 24 / 25 <i>Exchange student of Industrial Management</i>	Helsinki, Finland Aug 2023 – Dec 2023
Audencia Business School <i>Winter Programming Cross-Cultural Management and Human Development</i>	Nantes, France Jan 2023 – Feb 2023

Relevant Coursework

KAIST : Advanced Econometrics, Natural Language Processing, Data Analysis with Open Software
Ajou University : Management Information Systems, Business Analytics, Data Analytics, Machine Learning, Data Management, Business Programming

RESEARCH INTERESTS

Research Topic

Algorithm aversion and human-AI interaction in social platforms; Socio-economic consequences of generative AI

Research Methodology

Large-scale empirical analysis of user behavior; Causal Inference; Natural Language Processing (NLP)

WORKING PAPERS

Why do users dislike AI-generated Answers?: Evidence from Social Q&A Platform

Professor Chulho Lee at KAIST

- Crawled and compiled a dataset of 240,000+ Q&A records from a major social Q&A platform, enabling large-scale empirical analysis of user responses to AI-generated content.
- Employed Natural Language Processing (NLP) techniques to parameterize linguistic and stylistic features of AI-generated texts, quantifying dimensions previously treated as qualitative.
- Identified systematic patterns of user aversion toward AI-generated answers, contributing causal evidence to the emerging discourse on human-AI interaction in knowledge communities.

The Causal Impact of AI-Assisted Features on Crowdfunding Outcomes and Narrative Diversity

- Identified an exogenous platform design shock on a major social platform and currently assembling the corresponding panel dataset to support a natural experiment design (*Co-authored with Jooyung Park, Peking University.*)

RESEARCH PAPER

Empowering Entrepreneurial Resilience through Digital Capabilities in Manufacturing Firms: Based on AAT framework

- Currently published at *Technology Analysis & Strategic Management (TASM)*, contributing empirical grounding to the intersection of digital transformation and entrepreneurial resilience (*Co-authored with Minjae Park, Ajou University*)
- Analyzed a large-scale dataset of 4,000 South Korean manufacturing firms to empirically validate a digital resilience framework comprising Absorb, Adapt, and Transform (AAT) capabilities.

CONFERENCE & REVIEWER EXPERIENCE

Why do users dislike AI-generated Answers?: Evidence from Social Q&A Platform

- Korea Chapter of the Association for Information Systems (AIS), Oral Presenter
Jul, 2026
- Korea Intelligent Information Systems Society, Oral Presenter
May, 2026

Peer Reviewer of Technology Analysis and Strategic Management

2026

RESEARCH EXPERIENCES

Researcher SSK Project: Promoting AI Technology for Socioeconomic Development • Conducted a systematic literature review of 150+ academic and industry sources, synthesizing successful AI adoption case studies across sectors to identify replicable implementation patterns. • Developed strategic policy recommendations leveraging evidence-based insights to guide AI-driven socioeconomic development initiatives. • Produced structured analysis reports for project dissemination, contributing to both academic and applied research outputs.	Daejeon, South Korea Aug 2025 – Feb 2026
---	---

PROJECTS

Project Manager SOPT IT Project: Youth Ticket Reservation Platform	Seoul, South Korea
---	--------------------

• Spearheaded end-to-end development of a centralized ticket reservation platform for youth and college performance groups; the platform has since facilitated 30+ live performances post-deployment. • Integrated key features, including seat selection, reservation management, and automated notifications into a unified system, reducing operational friction for organizers. • Coordinated a cross-functional development team, managing timeline, feature prioritization, and delivery to ensure successful platform launch.	Jan – Sep 2024
Project Manager C2C Secondhand Instrument Trading Platform • Directed full-cycle development of a specialized C2C marketplace tailored to the unique needs of musicians and instrument hobbyists. • Designed trust and reliability mechanisms within the platform to ensure secure, streamlined transactions between buyers and sellers. • Oversaw product roadmap and team execution, aligning platform features with target user pain points to maximize adoption and usability.	Seoul, South Korea Dec 2023 – Jun 2024

TEACHING EXPERIENCE

Graduate TA, Department of Business and Technology Management, KAIST, Korea • ITM.70010 Mobility Innovation • BTM.30036 Technology marketing • CC.50011 Probability and Statistics • ITM.50050 Finance for Technology Management	2025 - Present
Undergraduate TA, Department of Business Administration, Ajou University, Korea • BIZ3617 Strategic Management (Capstone Design)	2024 - 2025

AWARDS

Kim Young-Han Global Leadership Scholarship	Fall 2026, Spring 2027
Global Leaders Award from Ajou University Center	Fall, Spring 2024
	Fall, Spring 2023
Mentoring Scholarships from Ajou University for Business	Spring 2023, 2024
Mentoring Scholarships from Hyundai Department Store	Fall – Spring 2022

WORK EXPERIENCE

AI Education Teaching Assistant, Korea Industrial Complex Corporation	Apr – June 2025
Career Instructor, High School Free Semester Program	Jan – June 2025
Student Intern, Gyeonggi Credit Guarantee Foundation	Jul – Aug 2023

VOLUNTEER EXPERIENCE

Mentoring Area Staff, Slush Helsinki, Finland	Sep – Dec 2023
Mentor for International Students, Global Buddy Program Ajou University	Mar – Jun 2022
